

**Public Works Department to Flush Hydrants
In the Town of St. Michaels and Bentley Hay**

The St. Michaels Public Works Department will flush the water system from Carpenter Street to Seymour, including Bentley Hay and the Rt 33 corridor this week on Thursday and Friday, March 30th and 31st. The Public Works Department initiates the flushing of the Town's water system annually. While flushing is in progress, customers may experience drops in water pressure or notice a rusty water color.

The Public Works Department recommends that customers avoid doing laundry during this time period and reduce the use of hot water. Please call the Town Office if you have any concerns or questions at 410-745-9535. Your cooperation and understanding are greatly appreciated.

By Authority of The Commissioners of St. Michaels
Jeff Richardson, Public Works Director
